Particulars: test item vs. test requirements

Equipment mobility: fixed

Operating condition: Continuous

Mains supply tolerance (%)

No direct connection

Tested for IT power systems: No

IT testing, phase-phase voltage (V): N/A

Class of equipment....: Class III

Mass of equipment (kg).....: 3.91 (With base)

0.52 (base only)

Protection against ingress of water: IP66

Test case verdicts

Test case does not apply to the test object.....: N/A

Test item does meet the requirement: Pass

Test item does not meet the requirement: Fail

Testing

Date of receipt of test item. 2011-09-26

Date(s) of performance of test.......... 2011-10-07 to 2011-10-18

General remarks

This test report shall not be reproduced except in full without the written approval of the testing laboratory. The test results presented in this report relate only to the item tested.

"(see remark #)" refers to a remark appended to the report.
"(see appended table)" refers to a table appended to the report.

Throughout this report a point is used as the decimal separator.

Brief description of the test equipment

- The equipment is a Class III Network Camera, The EUT is equipped with a progressive scan CCD sensor and provides a general I/O terminal block which is used to connect external input/output devices.
- The EUT installs to the celling. The power source can choose to use PoE or external DC(AC) power
- The maximum ambient temperature specified by manufacturer is 55°C
- The ETU complied with IEC 60529 IP66(see enclosure 7-01 for details, Models SD7313,SD7323 were same enclosure construction with Models SD8311E, SD8312E, SD8313E, SD8321E, SD8322E, SD8323E), dose not evaluated EN 60950-22.

Model Differences

The Model SD8313E was identical to models SD8311E, SD8312E, SD8321E, SD8322E, SD8323E, except for camera lens and model designation.

| Model | Model Camera lens | | Video standard |
|---------|---------------------|-----|----------------|
| SD8311E | FCB-EX490E 18x NTSC | | NTSC |
| SD8321E | FCB-EX490EP | 18x | PAL |
| SD8312E | FCB-EX995E | 28x | NTSC |
| SD8322E | FCB-EX995EP | 28x | PAL |
| SD8313E | FCB-1020 | 36x | NTSC |
| SD8323E | FCB-1020P | 36x | PAL |

Additional Information

N/A

Factory Location(s):

VIVOTEK INC.

5F, No.168, Lien-Cheng Rd., Chung-Ho District, New Taipei City, Taiwan, R.O.C.

Test condition

Temperature: 25°C Relative humidity: 60% Air pressure: 950 mbar

The test samples are pre-production without serial numbers.

Clause Requirement + Test Result - Remark Verdict

Supplementary information:

- The temperatures were measured under worst case normal mode defined in 1.2.2.1 and as described in sub-clause 1.6.2 and at voltages as described above.
- With a maximum ambient temperature of 55 °C
- All values for T (°C) are re-calculated from actual ambient which the actual ambient lower than manufacturer's specification ambient temperature.
- All values for T (°C) are without re-calculated from actual ambient which the actual ambient higher than manufacturer's specification ambient temperature.

Other component:

Other component:

- max. absolute temp. of 105 degree C (PCB)
- max. absolute temp. of 105 degree C (choke)
- max. absolute temp. of 85 degree C (Capacitor)
- when no class of insulation is given, min. insulation 105 °C assumed.

User accessible area:

- material is metal (70 degree C)
- material is plastic (95 degree C)

| | ZB ANNEX (normativ SPECIAL NATIONAL CONDI | | |
|---------|--|-----------------|---------|
| Clause | Requirement + Test | Result - Remark | Verdict |
| 1.5.8 | In Norway, due to the IT power system used (see annex V, Figure V.7), capacitors are required to be rated for the applicable line-to-line voltage (230 V). | | N/A |
| 1.5.9.4 | In Finland, Norway and Sweden, the third dashed sentence is applicable only to equipment as defined in 6.1.2.2 of this annex. | | N/A |
| 1.7.2.1 | In Finland, Norway and Sweden, CLASS I PLUGGABLE EQUIPMENT TYPE A intended for connection to other equipment or a network shall, if safety relies on connection to protective earth or if surge suppressors are connected between the network terminals and accessible parts, have a marking stating that the equipment must be connected to an earthed mains socket-outlet. | | N/A |
| | The marking text in the applicable countries shall be as follows: | | |
| | In Finland: "Laite on liitettävä suojakoskettimilla varustettuun pistorasiaan" | | |
| | In Norway: "Apparatet må tilkoples jordet stikkontakt" | | |
| | In Sweden: "Apparaten skall anslutas till jordat uttag" | | |
| | In Norway and Sweden, the screen of the cable distribution system is normally not earthed at the entrance of the building and there is normally no equipotential bonding system within the building. Therefore the protective earthing of the building installation need to be isolated from the screen of a cable distribution system. | | |
| | It is however accepted to provide the insulation external to the equipment by an adapter or an interconnection cable with galvanic isolator, which may be provided by e.g. a retailer. | | |

| Clause | Requirement + Test | Result - Remark | Verdict | |
| | The user manual shall then have the following or similar information in Norwegian and Swedish language respectively, depending on in what country the equipment is intended to be used in: | | N/A | |
| | "Equipment connected to the protective earthing of the building installation through the mains connection or through other equipment with a connection to protective earthing – and to a cable distribution system using coaxial cable, may in some circumstances create a fire hazard. Connection to a cable distribution system has therefore to be provided through a device providing electrical isolation below a certain frequency range (galvanic isolator, see EN 60728-11)." | | | |
| | NOTE In Norway, due to regulation for installations of cable distribution systems, and in Sweden, a galvanic isolator shall provide electrical insulation below 5 MHz. The insulation shall withstand a dielectric strength of 1,5 kV r.m.s., 50 Hz or 60 Hz, for 1 min. | | | |
| | Translation to Norwegian (the Swedish text will also be accepted in Norway): | | | |
| | "Utstyr som er koplet til beskyttelsesjord via nettplugg og/eller via annet jordtilkoplet utstyr – og er tilkoplet et kabel-TV nett, kan forårsake brannfare. For å unngå dette skal det ved tilkopling av utstyret til kabel-TV nettet installeres en galvanisk isolator mellom utstyret og kabel- TV nettet." | | | |
| | Translation to Swedish: | | | |
| | "Utrustning som är kopplad till skyddsjord via jordat vägguttag och/eller via annan utrustning och samtidigt är kopplad till kabel-TV nät kan i vissa fall medföra risk för brand. För att undvika detta skall vid anslutning av utrustningen till kabel-TV nät galvanisk isolator finnas mellan utrustningen och kabel-TV nätet." | | | |

|---------|--|-----------------|---------|
| Clause | Requirement + Test | Result - Remark | Verdict |
| 3.3.4 | In the United Kingdom, the range of conductor sizes of flexible cords to be accepted by terminals for equipment with a RATED CURRENT of over 10 A up to and including 13 A is: • 1,25 mm² to 1,5 mm² nominal cross-sectional area. | | N/A |
| 4.3.6 | In the United Kingdom, the torque test is performed using a socket outlet complying with BS 1363 part 1:1995, including Amendment 1:1997 and Amendment 2:2003 and the plug part of DIRECT PLUG-IN EQUIPMENT shall be assessed to BS 1363: Part 1, 12.1, 12.2, 12.3, 12.9, 12.11, 12.12, 12.13, 12.16 and 12.17, except that the test of 12.17 is performed at not less than 125 °C. Where the metal earth pin is replaced by an Insulated Shutter Opening Device (ISOD), the requirements of clauses 22.2 and 23 also apply. | | N/A |
| 4.3.6 | In Ireland, DIRECT PLUG-IN EQUIPMENT is known as plug similar devices. Such devices shall comply with Statutory Instrument 526:1997 - National Standards Authority of Ireland (Section 28) (Electrical plugs, plug similar devices and sockets for domestic use) Regulations, 1997. | | N/A |
| 5.1.7.1 | In Finland, Norway and Sweden TOUCH CURRENT measurement results exceeding 3,5 mA r.m.s. are permitted only for the following equipment: • STATIONARY PLUGGABLE EQUIPMENT TYPE A that is intended to be used in a RESTRICTED ACCESS LOCATION where equipotential bonding has been applied, for example, in a telecommunication centre; and has provision for a permanently connected PROTECTIVE EARTHING CONDUCTOR; and is provided with instructions for the installation of that conductor by a SERVICE PERSON; • STATIONARY PLUGGABLE EQUIPMENT TYPE B; • STATIONARY PERMANENTLY CONNECTED EQUIPMENT. | | N/A |

| Clause | Requirement - Test | | Result - Remark | Verdict |

| | ZB ANNEX (normative SPECIAL NATIONAL CONDITIONS) | | |
|----------------------|---|-----------------|---------|
| Clause | Requirement + Test | Result - Remark | Verdict |
| 6.1.2.1 (A1:2010) | In Finland, Norway and Sweden, add the following text between the first and second paragraph of the compliance clause: | | N/A |
| | If this insulation is solid, including insulation forming part of a component, it shall at least consist of either | | |
| | two layers of thin sheet material, each of which shall pass the electric strength test below, or | | |
| | - one layer having a distance through insulation of at least 0,4 mm, which shall pass the electric strength test below. | | |
| | Alternatively for components, there is no distance through insulation requirements for the insulation consisting of an insulating compound completely filling the casing, so that CLEARANCES and CREEPAGE DISTANCES do not exist, if the component passes the electric strength test in accordance with the compliance clause below and in addition | | |
| | passes the tests and inspection criteria of 2.10.11 with an electric strength test of 1,5 kV multiplied by 1,6 (the electric strength test of | | |
| | 2.10.10 shall be performed using 1,5 kV), and | | |
| | - is subject to ROUTINE TESTING for electric strength during manufacturing, using a test voltage of 1,5 kV. | | |
| | It is permitted to bridge this insulation with an optocoupler complying with 2.10.5.4 b). | | |
| | It is permitted to bridge this insulation with a capacitor complying with EN 60384-14:2005, subclass Y2. | | |

| Clause | Requirement - Test | | Result - Remark | Verdict |

| | ZB ANNEX (normativ SPECIAL NATIONAL CONDI | | |
|---------|--|-----------------|---------|
| Clause | Requirement + Test | Result - Remark | Verdict |
| | A capacitor classified Y3 according to EN 60384-14:2005, may bridge this insulation under the following conditions: | | N/A |
| | - the insulation requirements are satisfied by having a capacitor classified Y3 as defined by EN 60384-14, which in addition to the Y3 testing, is tested with an impulse test of 2,5 kV defined in EN 60950-1:2006, 6.2.2.1; | | |
| | - the additional testing shall be performed on all the test specimens as described in EN 60384-14; | | |
| | - the impulse test of 2,5 kV is to be performed before the endurance test in EN 60384-14, in the sequence of tests as described in EN 60384-14. | | |
| 6.1.2.2 | In Finland, Norway and Sweden, the exclusions are applicable for PERMANENTLY CONNECTED EQUIPMENT, PLUGGABLE EQUIPMENT TYPE B and equipment intended to be used in a RESTRICTED ACCESS LOCATION where equipotential bonding has been applied, e.g. in a telecommunication centre, and which has provision for a permanently connected PROTECTIVE EARTHING CONDUCTOR and is provided with instructions for the installation of that conductor by a SERVICE PERSON. | | N/A |
| 7.2 | In Finland, Norway and Sweden, for requirements see 6.1.2.1 and 6.1.2.2 of this annex. | | N/A |
| | The term TELECOMMUNICATION NETWORK in 6.1.2 being replaced by the term CABLE DISTRIBUTION SYSTEM. | | |
| 7.3 | In Norway and Sweden, for requirements see 1.2.13.14 and 1.7.2.1 of this annex. | | N/A |
| 7.3 | In Norway, for installation conditions see EN 60728-11:2005. | | N/A |

TEST REPORT

Report No.: HC40129/2009

Page: 1 of Date: May 7, 2009

VIVOTEK INC.

6F, NO. 192, LIEN-CHENG RD., CHUNG-HO CITY, TAIPEI COUNTY, TAIWAN, R.O.C.

The following merchandise was submitted and identified by the vendor as:

Product Description: Outdoor 35x Zoom Network Camera

Style / Item No.: SD7313/7323 / No.1

Manufacture / Vendor: VIVOTEK INC.

Quantity: Total 1 piece

Testing Period: May 4, 2009 to May 7, 2009

We have tested the submitted sample(s) as requested and the following results were obtained:

Test Required: (According to client's test specification, please see following sheets in detail.)

Test for Degrees of Protection Provided by Enclosures

| IP Code | IP66 Degrees of protection against access to hazardous parts and against solid foreign objects | |
|-------------------------------|--|--|
| First characteristic numeral | | |
| Second characteristic numeral | Degrees of protection against ingress of water | |

Test Results: - PLEASE SEE ATTACHED SHEETS -

TEST REPORT

Report No.: HC40129/2009

Page: 2 of 7

Test for Degrees of Protection Provided by Enclosures:

Test Equipment:

| Name | Brand | Model | Serial No. |
|--------------------------------|---------|-----------|-------------|
| Dust-proof Object Test Probe | ED&D | TRP-02 | B0050180 |
| Digital Force Gauge | ALGOL | HF-50 | HF-106746 |
| Dust Tester | MACHINE | TMJ-9723C | T-23-050411 |
| IPX6 Water Jet Hose Nozzle Set | PTL | P03.28 | 5040045 |

Lab Environmental Conditions:

Ambient temperature: 25±3°C

Relative humidity: 55±20%RH

Test Method/ Specification:

Test method: According to IEC 60529 Edition 2.1: 2001-02--IP66

1. Test for protection against access to hazardous parts:

Test method: <u>IEC 60529 Edition 2.1: 2001-02--IP6X</u>

The test wire with 1.0 mm in diameter and 100 mm long is pushed against or inserted through any openings of the enclosure with the force specified in Table 6 in IEC 60529 Edition 2.1; 2001-02. Examine whether the test wire

touches the hazardous live parts inside the enclosure or not.

Test force: <u>1 N±10 %</u>

Test for protection against solid foreign objects:

Test method: IEC 60529 Edition 2.1: 2001-02--IP6X (Dust test)

Type of dust: Talcum powder

The amount of dust: 2 kg
The chamber size: 1 m³
The maximum depression: -20 mbar
Test duration: 8 hours

Examine the protection against ingress of dust of specimen after this test.

TEST REPORT

Report No.: HC40129/2009 Page: 3 of 7

Test Method/ Specification-Continued:

3. Test for protection against water:

According to IEC 60529 Edition 2.1: 2001-02--IPX6 Test method:

Test means: Spraying the enclosure from all practicable directions with a stream of water

from a standard test nozzle as specified in test standard.

Internal diameter

of the nozzle: 12.5 mm

100 ℓ/min ±5% Delivery rate:

Distance from nozzle

to enclosure surface: between 2.5 m and 3 m

Core of the substantial

stream: circle of approximately 120 mm diameter at 2.5 m distance from nozzle

Test duration: 3 minutes (minimum)

Examine the protection against ingress water of specimen after this test.

TEST REPORT

Report No.: HC40129/2009 Page: 4 of 7

Specimen:

Style / Item No.: SD7313/7323 / No.1

Quantity: total 1 piece

Test Result:

A. Degrees of protection against access to hazardous parts and against solid foreign objects (IP6X)

A-1 Test for protection against access to hazardous parts (IP6X)

| Test Result | | |
|---|--|--|
| 2010 2 2000 | Style / Item No. SD7313/7323 / No.1 | |
| Check Item | | |
| 1 Does the test wire penetrate any openings of the enclosure? | No | |
| (followed check item 1) If the test wire penetrates any openings of the enclosure, does the test wire touch any hazardous live parts or any hazardous mechanical parts? | N/A | |
| (followed check item 2) Does adequate clearance be kept between the test wire and hazardous live parts or hazardous mechanical parts? | N/A | |

Note 1: N/A means "Not Applicable".

A-2 Test for protection against solid foreign objects (IP6X)

| Test Result | |
|--|------------------|
| | Style/Item No. |
| Check Item | SD7313/7323/No.1 |
| Does any dust deposit inside the enclosure at the end of the test? | No |
| Functional check | N/A |

Note 1: N/A means "Not Applicable".

Note 2: The check items in this test report for inspecting the degree of protection provided by enclosures are reference to the requirements specified in IEC 60529 Edition 2.1: 2001-02 and in accordance with the acceptance conditions specified by client.
