Release Note for VigorAP 902

Firmware Version:	1.2.5
Release Type:	Normal
Applied Models:	VigorAP 902

With this high cost-efficiency VigorAP 902, computers and wireless devices which are compatible with 802.11ac can connect to existing wired Ethernet network via this VigorAP 902. Easy install procedures allows users to setup a network environment in very short time - within minutes, even inexperienced users.

New Features

- Support USB TemPer1F (change IC).
- Accept the access control list transferred by VigorACS.

Improvement

- Corrected: Unable to bring the UDP connection information while registering to VigorACS.

Known Issue

- None.

Notes

- To enhance the security among wireless clients, the SSIDs on the different bands (2.4GHz / 5GHz) will be isolated. That is, wireless clients with different bands can not communicate with each others even they are on the same subnet.
