

## Release Note for VigorSwitch FX2120

|                   |                                                                                                                    |
|-------------------|--------------------------------------------------------------------------------------------------------------------|
| Firmware Version: | 3.9.12                                                                                                             |
| Release Type:     | Important – Review release notes and upgrade if the changes affect your system stability, performance, or security |
| Applied Models:   | VigorSwitch FX2120                                                                                                 |

VigorSwitch FX2120, 12 SFP ports, is a standard switch that meets both IEEE 802.3u/ab Fast Ethernet and Gigabit Ethernet specifications.

### New Features

- None.

### Improvement

- Improved: Strengthened Web/CGI security and addressed multiple security issues (CVE-2026-71917, CVE-2026-71919 to CVE-2026-71922, CVE-2026-71929 to CVE-2026-71933, and CVE-2026-71935 to CVE-2026-71943).

### Known Issue

- None.

### Note

- STP (Spanning Tree Protocol) is enabled by default starting from firmware version 2.9.8, which may result in a slightly longer link-up time for ports.
