

## Release Note for Firmware Upgrade Utility

|                          |                       |
|--------------------------|-----------------------|
| Firmware Version:        | 3.6.10                |
| Release Type:            | Normal                |
| Applied Operation System | Windows XP/Vista/7/10 |

### New Features

- None.

### Improvement

- Corrected: The finish pop-up dialog delayed after the utility upgraded the newest firmware file for some specific models.
- Improved: Remove the Dynamic-link library (DLL) which is used no longer to prevent the false alert from anti-virus software.

### Known Issue

- None.

### Note

- For the user using the utility with version 3.6.9, it is recommended to use this version instead.
